(54) Title: BI-DIRECTIONAL OPTICAL MODULES PACKAGE

(57) Abstract: Provided is a bi-directional optical module package having an optical module unit comprising a substrate member, an optical filter installed on the substrate member to be inclined with respect to an optical fiber, a first holder supported by the substrate member on one side of the optical filter and having a laser diode and a lens for transmitting an optical signal to the optical fiber through one side of the optical filter, and a second holder supported by the substrate member on the other side of the optical filter and having a photodiode and a lens for receiving the optical signal received through the optical fiber through the optical filter.
